-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 111, 112, 115-141, 144-158 and 160-163 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kwok in view of Lou, both of record, and Chang et al (2002/0137284). The discussion of the Kwok and Lou references in the previous actions is hereby incorporated by reference. In addition to the features taught by those references, the Chang reference has been added to more explicitly show the use of an oxygen sink layer which is formed on a vertically extending surface of the conductive layer.

For example, as shown in FIG. 1(g) of Chang, there is formed a polysilicon layer (3), covered by a barrier layer (4), with a conductive layer (5) formed there over in an opening of an insulating layer (15). In addition, an oxygen absorbing layer (11) of silicon nitride contacts the vertically extending sidewall of the conductive layer (5), as claimed.

Taken together, these references teach all of the claimed features, and one skilled in the art would be motivated to combine these references in order to reduce unwanted oxidation of the electrode material.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Wojciechowicz whose telephone number is 571-272-1739. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ken Parker can be reached on (571) 272-2298. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
